

Improving agriculture and food safety with leading scientific research

The **Chinese Academy of Inspection and Quarantine (CAIQ)** is responsible for the country’s food safety, and maintains animal and plant quarantine protocols. With a technical focus on molecular biology, CAIQ relies on the latest scientific research and discoveries from around the world to carry out its vital mission.

The Institute of Animal and Plant Quarantine is one of 11 institutes affiliated with CAIQ. Ms. Huang Ying is a researcher at the institute and was instrumental in acquiring BioOne Complete for the institute. Ms. Huang and her colleagues recognized that many of the titles represented in BioOne Complete complemented and supported their research goals and activities.

“The BioOne Complete subjects are relevant to our institution and match our research needs very well,” Ms. Huang explained. “Furthermore, the price is very reasonable for the wealth of content included.”

INSTITUTE OF ANIMAL AND PLANT QUARANTINE

BY THE NUMBERS

Prior to acquiring BioOne Complete, the institute operated on a pay-per-article basis through the National Science and Technology library, but this became “expensive and restrictive,” according to Ms. Huang. “Importantly, as a non-profit organization, BioOne Complete’s pricing is friendly. Purchasing a BioOne subscription was far more affordable for us and helped my research output.”

“We are now saving a lot of lost research time by having instant access to so many relevant journals and interesting content in one comprehensive platform.”

Institute of Animal and Plant Quarantine
Chinese Academy of Inspection and Quarantine

BioOne continues to demonstrate the value of its platform to leading research institutions around the world, from a content as well as a cost perspective. According to the 2019 Library Journal Periodicals Price Survey, the average journal price was \$3,769 in biology and \$2,072 in agriculture. Even at its maximum, doctoral-level price, BioOne Complete represents a 94% savings on a per-title basis.

“The BioOne platform is very user friendly. And as such a specialized institute, relevant content is far more discoverable than ever before,” said Ms. Huang. “We are now saving a lot of lost research time by having instant access to so many relevant journals and interesting content in one comprehensive platform.”

ACADEMIC ACHIEVEMENTS & AWARDS

150+

scientific and technological achievement awards

700+

scientific research projects

800+

published technical regulations & mandatory standards

400+

patents

1400+

scientific papers

140+
