

# Producing Some of Europe's Most Distinguished Bioscience Research

The **University of Amsterdam's (UvA)** open, tolerant and international academic tradition dates to 1632 when its predecessor, the *Athenaeum Illustre*, was founded by two prominent academics. Since then, the UvA has grown into a world-class international research university with over 30,000 students, 3,000 PhD researchers, 6,000 staff, and 100 different nationalities. The University ranks among Europe's 20 best universities.

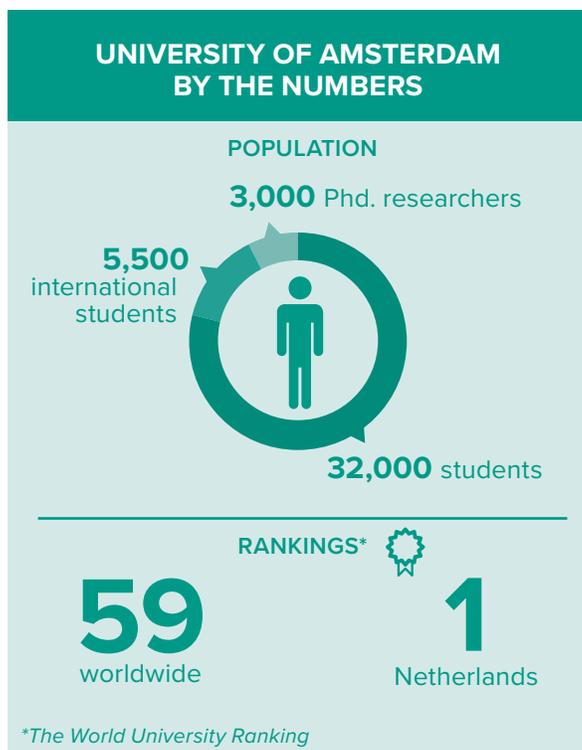

*BioOne Complete offers the ability to acquire quality titles which would otherwise be difficult to get. [It] provides a cost-effective way to subscribe to bioscience titles and being well below the average inter-library loan cost, is very positive. If universities are looking for biology packages, then yes, I would recommend BioOne Complete.*

– George Meerburg, Bioscience Information Specialist  
University of Amsterdam

Mr. George Meerburg has been the Bioscience Information Specialist for **UvA** since 2000. He advises library purchases and acquisitions, and sits on the library committee for four of the life science institutes that he manages.

The Knowledge Exchange Agreement allowed all Dutch institutions to access BioOne Complete free of charge for three years, 2009 to 2011. The library committee at **UvA** evaluated the value of BioOne Complete during this period, and saw a high level of usage from the Zoology and Toxicology departments, among others.

## There are 204 BioOne Complete papers published by authors from UvA, which helps boost the University's profile and reputation

BioOne Complete offers 53 Zoology titles, including *African Zoology*, *Copeia*, *Journal of Ethnobiology*, *Malacologia*, *South American Journal of Herpetology*, *Ursus*, *Wilderness & Environmental Medicine*, *Zoosystema*.

**UvA** decided to continue with a paid subscription to BioOne Complete after the Knowledge Exchange Agreement concluded. Then, in 2013-2014, the Zoology and Toxicology departments moved to Leiden University. Continuing to promote and evaluate BioOne, Mr. Meerburg and his team again identified increased usage of BioOne Complete, particularly in the areas of Ecology and Evolution. This coincided with BioOne's addition of more ecology and evolution journals particularly relevant for these departments and of interest to biologists and researchers. With 62 titles in Ecology and 20 titles in Evolutionary Biology, including niche titles like *Freshwater Science*, BioOne Complete has become an attractive and valuable investment for **UvA**.

There are currently 204 BioOne papers published by authors from **UvA**, which helps boost the University's profile and reputation across Europe and around the world. "We are also sympathetic to the publication model, being not for profit and a mission-based organisation is positive," said Mr. Meerburg. "BioOne Complete supports open access, too, which is also very important in the Netherlands."
